New Instructions: Please complete all information, including average. If you did not keep records, you must estimate an average. This number should reflect the average number of points a quizzer has scored in the first round of individuals, and must be between 0 and 100. Do not average their score from individual finals rounds. Only calculate averages from months when the quizzer competed. If the quizzer never competed in individuals, average their team score and indicate this in the notes column.

For example: If your quizzer, in preliminary individual competition, scored 40 in October, 80 in March and 20 in April and didn't advance in those months. She scored 100 in November with 0 in finals, 80 in December with 60 in finals and 100 in January with 100 in finals. Only average the preliminary rounds: 40, 100, 80, 100, (she missed the February quiz), 80, 20. Her average is: 420 divided by 6, or 70. Indicate with an X in the column whether the average is calculated or estimated.

Use the notes field to indicate any anomalies: "Quizzed STV individuals even though she's a Rookie" or "Only attended 2 meets whole year" or "Never quizzed Individuals using average from team"
